Improve Safety and Decrease Administrative Burden for Schools Utilizing Our Seamless and Adaptable Visitor Management Solution, Enhancing Security and Relieving Front Office Staff

Ensure Safety and Efficiency in Schools with Positive Proof's Intercept 2 Visitor Management Solution. Empowering school administrators to prioritize the well-being of their students and staff, optimize front office operations, minimize hardware downtime, and create a welcoming school environment. Our streamlined platform enhances security measures and minimizes the inconvenience of visitor check-in by securely and discreetly vetting each visitor on campus.

ENHANCED SCHOOL SAFETY

Identify and verify unauthorized individuals and obtain real-time visibility of all individuals inside your premises at any given moment, especially during critical emergencies where accuracy is crucial.

OPTIMIZE EFFICIENCY

Register visitors effortlessly including tardy student records and pass printing, eliminating manual procedures and handwritten passes to ensure smooth operations.

ELIMINATE HARDWARE DEPENDENCIES

Leverage Cloud-Based Software without the requirement of proprietary hardware or "DRM" printers for a simple, adaptable, cost-effective, and streamlined implementation and utilization.

MAXIMIZE CAMPUS AWARENESS

Regulate Campus Access
Establish tailored watchlists, custody guidelines, and restrictions, along with various visitation rules, to manage individuals who may pose risks to staff or students

Screen Every Visitor
Thoroughly vet each visitor by cross-referencing the sex offender database and your customized watchlist discreetly

Stay Informed about Custody
Effortlessly maintain and access custody instructions via seamless integration with your Student Information System

Notify Security Privately
In case of flagged visitors, discreetly notify your security team through text or email, without causing alarm to the visitor

Maintain Ongoing Visibility
Obtain real-time visibility through a comprehensive visitor dashboard, enabling continuous monitoring of individuals in your premises and their purpose of visit

Facilitate Contact Tracing
Mitigate the risk of infectious diseases, including COVID-19, within your facilities and promptly initiate contact tracing, if required

Personalize Visitor Badges
Exercise control over the information displayed on visitor badges, offering flexibility to include a photo of their driver's license or webcam image

FOSTER A WELCOMING SCHOOL COMMUNITY, STREAMLINE OPERATIONS, AND REDUCE PAPERWORK

Facilitate a smooth check-in process for both front office staff and visitors, enhancing efficiency and maintaining a welcoming environment while simultaneously bolstering security measures.

ENHANCE OPERATIONAL EFFICIENCY

● Effortless Deployment

Positive Proof's Visitor Management platform offers a swift and smooth implementation process, requiring minimal onboarding. This ensures that your front office staff can quickly adapt and operate the system seamlessly.

● Seamless Integration

Seamless integration with SIS so that you have access to the most up-to-date information, including custody instructions, right at your fingertips.

● Cloud-based Solution

Accessible via the cloud-based software, which can be conveniently accessed from any computer, mobile phone, and tablet devices. This allows school staff to effortlessly log in and utilize the system anytime, anywhere.

● Customizable System

Enjoy complete flexibility with our Visitor Management system tailored to your specific requirements. Create personalized watchlists, generate only the reports you need, and benefit from unlimited check-in stations.

● Efficient Student Check-in and Early Release

Efficiently handle student tardies and early releases within the system to minimize paperwork, manual processes, and seamlessly synchronize the information with SIS integration.

● Self-Service Check-in

Visitors can conveniently check-in remotely for pre-registration or at a dedicated station in the front office. For frequent visitors, a quick scan allows them to proceed swiftly. Once the system validates their information, their badge is printed, enabling visitors to continue their journey while reducing unnecessary contact and exposure.

LEVERAGE HARDWARE

BUILD YOUR OWN HARDWARE BUNDLES AND REDUCE COSTS

Customize hardware selection for check-in without additional requirements. Integrate web cams, scanners, and printers for streamlined Visitor Management. Save on costs, simplify maintenance, and leverage existing hardware. Set up multiple check-in stations at no extra expense. Compatible with current visitor management hardware and school tablets.
